

Anti-Wrinkle Injections in Leicester

Our anti-wrinkle treatments offer a safe, non-surgical solution to reduce forehead lines, crow's feet, and frown lines. By gently relaxing targeted muscles, we soften expression lines while maintaining natural facial movement.

Delivered by experienced medical injectors, treatments are tailored to achieve subtle, refreshed results — never frozen or overdone — with minimal downtime.

Dermal Fillers

Dermal fillers restore lost volume, smooth deeper lines, and refine facial structure. We treat areas including lips, cheeks, jawline, and under-eyes using premium, clinically approved fillers.

Results are immediate, natural-looking, and minimally invasive — ideal for restoring youthful balance without surgery.

Collagen-Stimulating Injections

Ellansé is an advanced injectable that restores facial volume while stimulating your body's natural collagen production. Over time, skin becomes firmer, smoother, and more elastic.

Ideal for patients seeking long-lasting rejuvenation with gradual, natural enhancement and minimal downtime.

Polynucleotide

Polynucleotides are advanced regenerative injectables designed to remodel and rejuvenate the skin. They improve elasticity, hydration, and texture while reducing fine lines, dark circles, and skin laxity.

Using premium brands such as Plinest and Newest, we treat the face, under-eyes, neck, décolleté, and hands to stimulate collagen production and support cellular renewal.

Skin Peels

Using the advanced Mesoesthetic range, our medical-grade skin peels remove dead skin cells, stimulate cell turnover, and improve tone and texture.

Effective for acne, pigmentation, rosacea, and dull skin, peels are comfortable with minimal downtime. A course of treatments is typically recommended for optimal results.

Carboxytherapy

Carboxytherapy uses sterile CO₂ injections to stimulate circulation and collagen production. This improves firmness, smooths skin, and reduces the appearance of cellulite, stretch marks, and dark under-eye circles.

A safe, minimally invasive treatment with minimal side effects. Multiple sessions are recommended for best results.

Skin Boosters

Skin boosters deeply hydrate and revitalise from within. Prohilo improves skin laxity and firmness, while NCTF nourishes with hyaluronic acid, vitamins, and antioxidants.

Ideal for dull skin, early ageing, and loss of elasticity — delivering radiant, refreshed skin with no downtime.

Signature Facials

Our 75-minute Live Probiotic Facial delivers intensive skin restoration using live lactobacillus probiotics and advanced hydration techniques.

Designed to rebalance the skin microbiome, improve barrier function, and restore natural radiance using Esse Organic skincare.

Weight Loss Injections

Our medically supervised weight-loss injections support appetite control and metabolic balance. When combined with healthy lifestyle changes, they help reduce calorie intake and support sustainable weight management.

Each treatment plan is personalised to ensure safe, effective, long-term results.

Vitamin Injections – Biotin & B12

Vitamin B12 and Biotin injections support energy levels, improve hair strength, and enhance skin health. Intramuscular delivery ensures faster absorption compared to oral supplements.

Ideal for individuals experiencing fatigue, hair thinning, or nutrient deficiency.
